DETAILED ACTION

Election/Restrictions

1. Applicant's election of claims 1-16 in the reply filed on November 5th, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Acknowledgement is also made of applicant's cancellation of claims 17-32.

Allowable Subject Matter

2. Claims 1-16 are allowed.

3. The following is an examiner's statement of reasons for allowance. The prior art of record and to the examiner's knowledge does not teach or render obvious, at least to the skilled artisan, the instant invention regarding a mixed-mode process for integrated circuits, wherein first and second conductors, a MOS (metal-oxide-semiconductor) transistor and a capacitor are formed in different regions on a semiconductor substrate, particularly characterized by forming a mask on the substrate which exposes *only* the second conductor, and then performing a first ion implantation step to dope the second conductor and an etching process to remove a specific thickness of the second conductor, wherein the ion implantation and etching processes can be done in either order. Claims 2-16 are dependent upon claim 1.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. The following references are cited as being related to the applicant's invention: Shao et al. (6,156,602) and Huang (5,918,119).
